

SHAHINA SAREEN K T

B.Sc Computer Science Student

+917594006269 | Bengaluru, Karnataka | Email: shahinasareenkt@gmail.com
LinkedIn.com/shahinakt | GitHub.com/shahinakt | Medium.com/shahinasareen
Portfolio: www.shahinasareen.tech

SUMMARY

Computer Science undergraduate with hands-on experience through academic and self-driven projects in web development, basic AI/ML, and cybersecurity concepts. Familiar with Python and JavaScript, and experienced in building simple full-stack applications using modern frameworks. Possesses a good understanding of programming fundamentals such as DSA, OOP, debugging, and the software development lifecycle. A quick learner with strong communication skills, seeking an opportunity to grow through real-world software development experience.

EDUCATION

B.Sc. Computer Science

Le-Ment College, University of Calicut

CGPA: 7.79

2023 – 2026

Higher Secondary Studies - Biology Science

NCERT – GHSS Pattambi

Percentage: 76%

2021 – 2023

SSLC

KBPE - GHSS Pattambi

Percentage: 99%

2020 – 2021

AREA OF INTEREST

- ✓ Software Development
- ✓ Problem-Solving
- ✓ Documentation

CERTIFICATIONS

1. Full-Stack JavaScript Development - LinkedIn Learning
2. Advanced Python AI Projects - LinkedIn Learning
3. Advanced Cyber Threat Intelligence - LinkedIn Learning
4. Generative AI Career Essentials - Microsoft & LinkedIn Learning
5. Cloud Architecture: Advanced Concepts - LinkedIn Learning

PROJECTS & EXPERIENCE

1. Threat Intelligence with Chatbot Integration

Tech Stack: React.js, FastAPI, MongoDB, TailwindCSS, AI

- Full-stack AI-driven platform detects phishing and scam links in real time using AI with user reporting and global threat heatmaps.
- Features chatbot assistance for incident reporting and blockchain-based data verification.

2. AI-Based CCTV Multi-Detection System

Tech Stack: YOLOv8, OpenCV, React, Firebase, FastAPI, PostgreSQL

- Built a full-stack, AI surveillance system that detects violence, theft, in real time using computer vision.
- Integrated blockchain-backed video verification, instant web and mobile alert notifications, and live analytics dashboards.

Other Projects:

- i. Disease Predictor with Chatbot -FastAPI, Scikit-learn, React
- ii. AI Resume ATS Checker – FastAPI, spaCy, NLP
- iii. ML Plant Image Classifier – React, Vite, TensorFlow.js

KEY ACHIEVEMENTS

Self-Taught Programmer

Built advanced AI & Full- Stack Development skills through independent learning.

TechFest Debugging Winner

Won 1st Place in an inter-college Debugging Competition.

Medium Writer

Authored 60+ articles with over 10,000+ claps, engaging readers on AI and Tech Innovation.

STRENGTHS

- ✓ Fast Learner & Adaptable
- ✓ Problem-Solving
- ✓ Time Management
- ✓ AI Tools & Prompt Engineering

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frameworks & Libraries: React.js, Node.js, Next.js, FastAPI, Tailwind CSS

AI/ML & Data Tools: scikit-learn, TensorFlow, OpenCV, Pandas, spaCy, Prompt Engineering

Cybersecurity: MITRE ATT&CK, OSINT, Threat intelligence

Backend & APIs: RESTFUL APIs, WebSockets

Databases: PostgreSQL, MongoDB

Cloud & DevOps: Git, GitHub, CI/CD, Vercel

Tools: VS Code, Jupyter Notebook, Linux
